BROOKINGS, SOUTH DAKOTA

Wholesale Farm Seed Price List

THE 1962 FEED GRAIN PROGRAM is essentially the same as the Feed Grain Program in 1961 with the exception that barley is now also included. This should again stimulate sales of grasses and legumes to be planted on the diverted acres. Northern alfalfa and sweet clover are in short supply and we would recommend that you anticipate your needs as much as possible as it is very likely that prices will strengthen as the spring demand develops.

STARCROSS BRAND WL-200 Alfalfa has been approved by the South Dakota Agricultural Stabilization and Conservation Service. This now makes Starcross eligible for any program payments in all of the states in which it is sold. Starcross will produce fine stemmed, leafy hay; it is winter hardy and wilt resistant. It will give maximum production of high protein hay.

SEXAUER 660 Brand Alfalfa is a variety blend combining the best characteristics of winter hardy, northern alfalfa varieties for high production and consistent performance.

FERTILAND BRAND is a new blend which we are introducing this year. It is a blend made up of the highest quality, best producing southern alfalfas which will give maximum performance for fall pasture and plow down purposes.

SEXAUER BRAND S-100 HYBRID SUDAN GRASS SORGHUM has been classified as a Sudan Grass type plant by the ASCS and can be planted on conserving acres without being applied against the corn or sorghum base. In dry land test at Brookings, S-100 has produced in excess of 24 tons per acre superior silage. It has excellent palatability, superior early growth, excellent regrowth if pastured and will give up to 84% increase in silage or forage tonnage over the common or piper sudan varieties.
